SMALL SCALE AQUACULTURE BUSINESS PLANNING IN CAMEROON
April 24th, 2019 - retail pond bank for about xaf 700 per kg xaf 500 1 USD and catfish minimum size 400 g for xaf 1500 per kg. Despite a number of research and extension projects aimed at improving the productivity and profitability of small scale aquaculture systems in Cameroon, few of these have achieved sustainability.
Freshwater fish seed resources in Indonesia

April 25th, 2019 - Small scale fish hatcheries

There are about 26,365 small scale hatcheries owned by an individual or a farmer group. Most of the individual farmer hatchery operators are small scale and use traditional technology transferred from generation to generation. Species most commonly used are common carp, tilapia, giant gourami, and Java barb.

The socioeconomics of small scale fisheries

April 25th, 2019 - The socioeconomics of small scale fisheries based on Abaya, Ethiopia during catch assessment study and all are commercially important and these are tilapia Oreochromis niloticus representing 68 and 39 of the catch, catfish Clarias gariepinus representing 24 and 38 of the catch, Silver catfish Bagrus docmac representing 3 and 8.

Economic Analysis of Nile Tilapia Oreochromis niloticus

January 17th, 2018 - Information on production costs could assist fish farmers in economic and financial planning. Economic profitability of small scale Nile tilapia production in Tanzania is analyzed using a model that simulates individual fish growth and takes into account fish population dynamics in the pond.

This paper presents a profitability assessment tool developed for the purposes of evaluating the feasibility of fish farming investment and operations. As a test case, small scale African catfish Clarias gariepinus farming in the Lake Victoria basin, Kenya is used.

The costs and returns analysis shows that small scale catfish farming is profitable with a net farm income of N 243 00 per kg. While catfish farming is profitable, much need to be done for farmers to better utilize available resources in order to achieve higher production levels and profit for guaranteed sustainability.

A Survey on the Processing and Distribution of Smoked Catfish

April 24th, 2019 - Finally the study revealed the existence of a thriving profitable small scale traditional smoked catfish Heterobranchus and Clarias spp. processing, distribution, and retailing business in the study area. Identified the major constraints in the business and suggested solutions to ameliorate the situation.
